

Testimonial from a SWAN Fostering Foster Carer's

Own Child

Fostering and Me

I have been fostering for six-months. It's like having a best friend sleeping over for a long time.

I love it because I have a person, other than my sister, to do activities with like, going out on walks, going to town, and talking to each other. But when we get a new child everything might change because everyone has a different personality and comes from a different place.

I look forward to the years' ahead and meeting new friends.
