

## Testimonial from a Local Authority Social Worker

**S** has been very accommodating to a demanding placement in terms of the need for extensive travelling and the day-to-day schedule for the children. **S** has focussed on the needs of the children throughout. At times, **S** has faced criticism from the birth parents regarding the care of the children. **S** has been able to discuss this and respond appropriately. It is important for **S** not to allow this impact on her confidence as a foster carer, and to be confident in making appropriate decisions for the children as their full time carer.
